EDUCATION

University of Arkansas at Pine Bluff; Expected December 2029 — Pine Bluff, AR
Bachelor of Science, Computer Science; 4.00 GPA

Obafemi Awolowo University; October 2023 - January 2026 — Osun, NG
Bachelor of Science, Computer Engineering; 4.97 GPA

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C/C++, SQL (Postgres), HTML/CSS, R
Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI, Firebase
Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ
Libraries: pandas, NumPy, Matplotlib
Interests: Scalable Systems, Cloud & AI Integration, Software Architecture, Open-Source Collaboration

WORK AND VOLUNTEER EXPERIENCE

February 2024 - January 2026 — **LinkedIn Local Ife** — Osun, NG
Team Lead & Event Organizer

- Organized community tech meetups focused on networking and career mentorship.
- Supported students transitioning into tech
- careers and personal branding.

August 2024 - December 2025 — **TracerQ** — Lagos, NG
AI Engineer

- Designed an algorithm workflow to detect AI voice, video, and image deepfakes, and clone detection.
- Built a QR-based chain verification platform using Next.js and FastAPI to ensure product authenticity.
- Developed secure REST APIs and scalable data models for end-to-end product traceability.
- Delivered a responsive frontend enabling live verification and transparency across the supply chain.

January 2023 - November 2024 — **Cowrywise** — Osun, NG
Campus Ambassador

- Led financial literacy initiatives across campus.
- Organized workshops introducing students to savings and investment tools

September 2023 - June 2024 — **Recruit AI** — Osun, NG
Software Engineer

- Built an AI-powered recruitment system that enables employers to create jobs, add custom questions, and evaluate applicants through automated analysis using Next.js, Firebase Auth, and AI Evaluation APIs.
- Implemented job creation, question customization, and automated candidate analysis.
- Integrated AI text evaluation workflows to streamline hiring decisions.
- Improved recruiter productivity through a clean and efficient UI.

January 2023 – June 2023 — **CoopWise** — Osun, NG
Software Engineer

- Built a digital cooperative management platform using Next.js and Firebase to automate savings, loan
- requests, and record tracking community cooperatives.
- Developed secure member dashboards and real-time updates.
- Designed scalable data models used for transactions and cooperative activities.
- Improved user experience by integrating automated workflows for cooperative admins.

ACTIVITIES AND HONORS

Member, Carolyn F. Blakely Honors Program (2026-Present) • Member, National Society of Black Engineers (NSBE) (2026-Present) • Recipient, Chancellor's Scholarship (Four years)
